

Weekly Report #6

Date 10/5/14

Project Name: Lion Stalking Device

Group Number:22

Group Members: Rachel Bilski, Quinn Kern Allely, Joshua Wong

Current status of project:

This past week our group met twice. During our first meeting, we brainstormed project ideas and talked about each one's feasibility. Our goal was to come up with 5 ideas by our next meeting before discussing them with our client. After combining our individual ideas, we met with our client, Steve Birch at the St. Louis Zoo, and asked for his input regarding those ideas and the pros and cons regarding each one. We also asked for a layout of the lion habitat and a facilities manager that we can contact once we progress further with our ideas.

Work planned for next week:

For this coming week, we will continue to expand on our ideas so that we can begin our progress report. We will meet on Wednesday and discuss any new ideas and start honing in on our top 12 ideas.

Anything needed from client or TA or instructor to continue work:

I don't think we need anything at this point.
